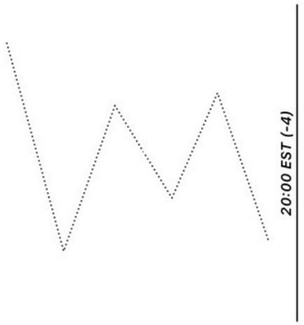
ASIA SESSION STRATEGY

SFX

𝕏 @ShaylinFX

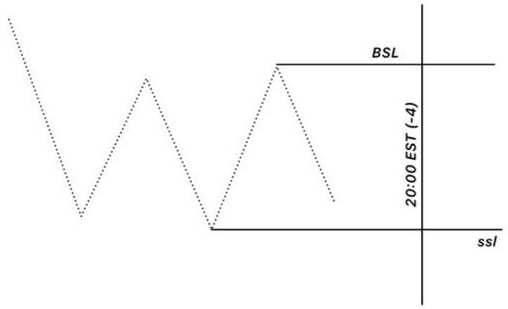


Pairs it works on:

-XAU/USD
-XXX/JPY (Currencies)

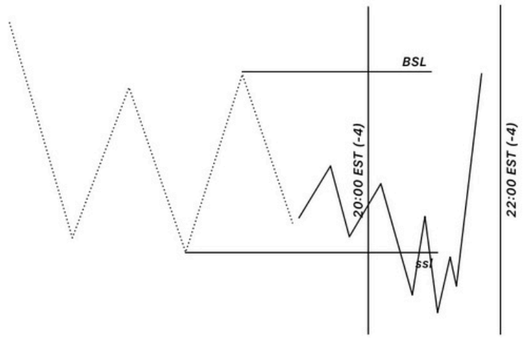
STEP ONE:

- Make sure you using 15M Timeframe
- Make sure your time zone is on (UTC -4)
- Mark out 20:00 EST



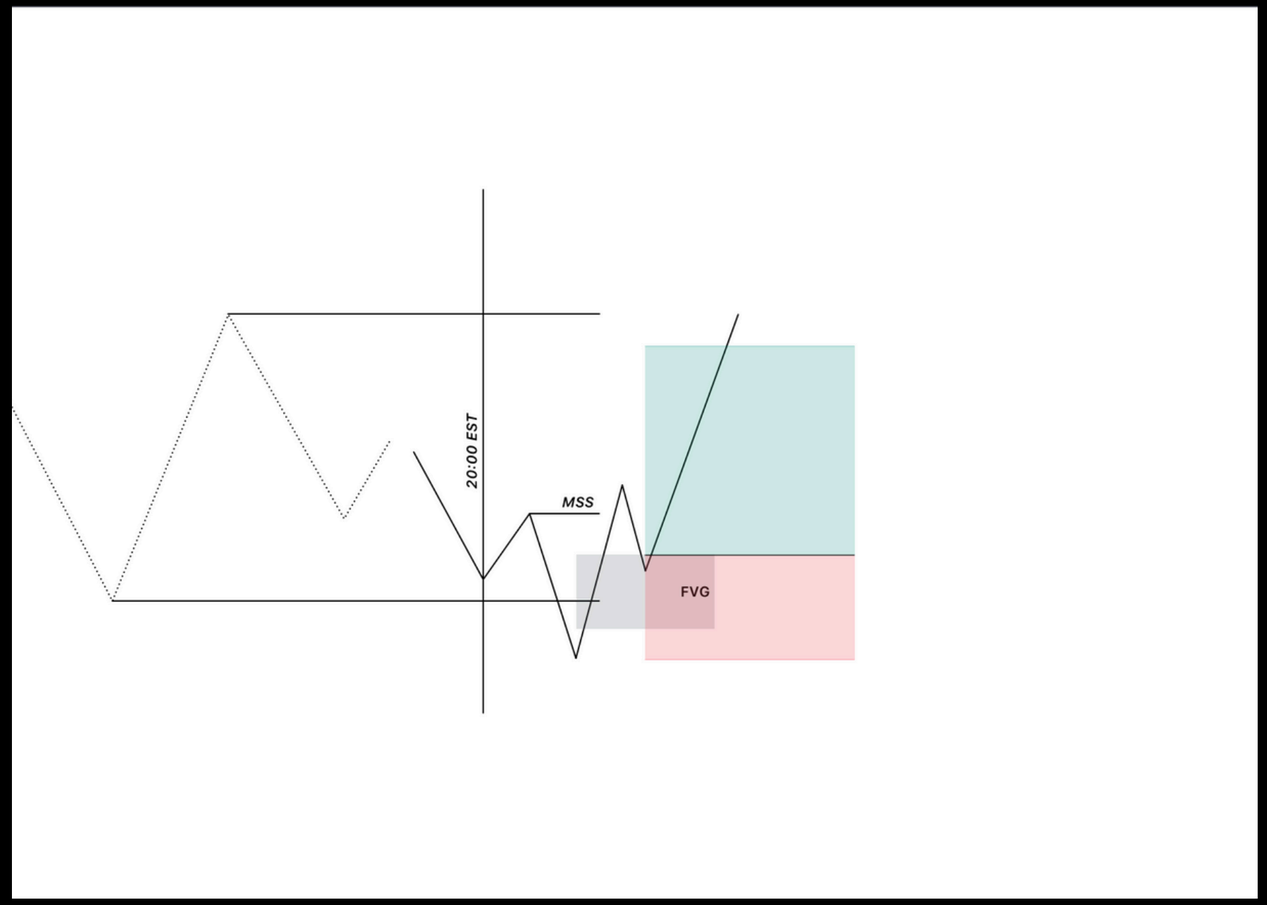
STEP TWO:

- Mark out the nearest buyside liquidity and sell side liquidity



STEP THREE

- Wait until either the nearest BSL/SSL in purged
- THE PURGE HAS TO OCCUR WITHIN THE TIME DURATION FROM 20:00 -22:00
- When a purge occurs, PATIENTELY wait till there is a MSS and a formation of an FVG
- USE THE 1M/3M TIMEFRAME once the purge has occurred to identify the MSS + FVG
- IF THE PURGE DOES NOT OCCUR WITHIN THE TIME OF 20:00-22:00 IT WILL BE INVALID



STEP FOUR

- Entry Model:

-After there is a MSS on the 1M/3M TF wait till an FVG is created
-Once it is created wait for a mitigation
-As we get the Mitigation we will enter
—PUT YOUR SL AT THE FORAMTION OF THE FVG
-Then you target a 1:2 RR

𝕏 @ShaylinFX

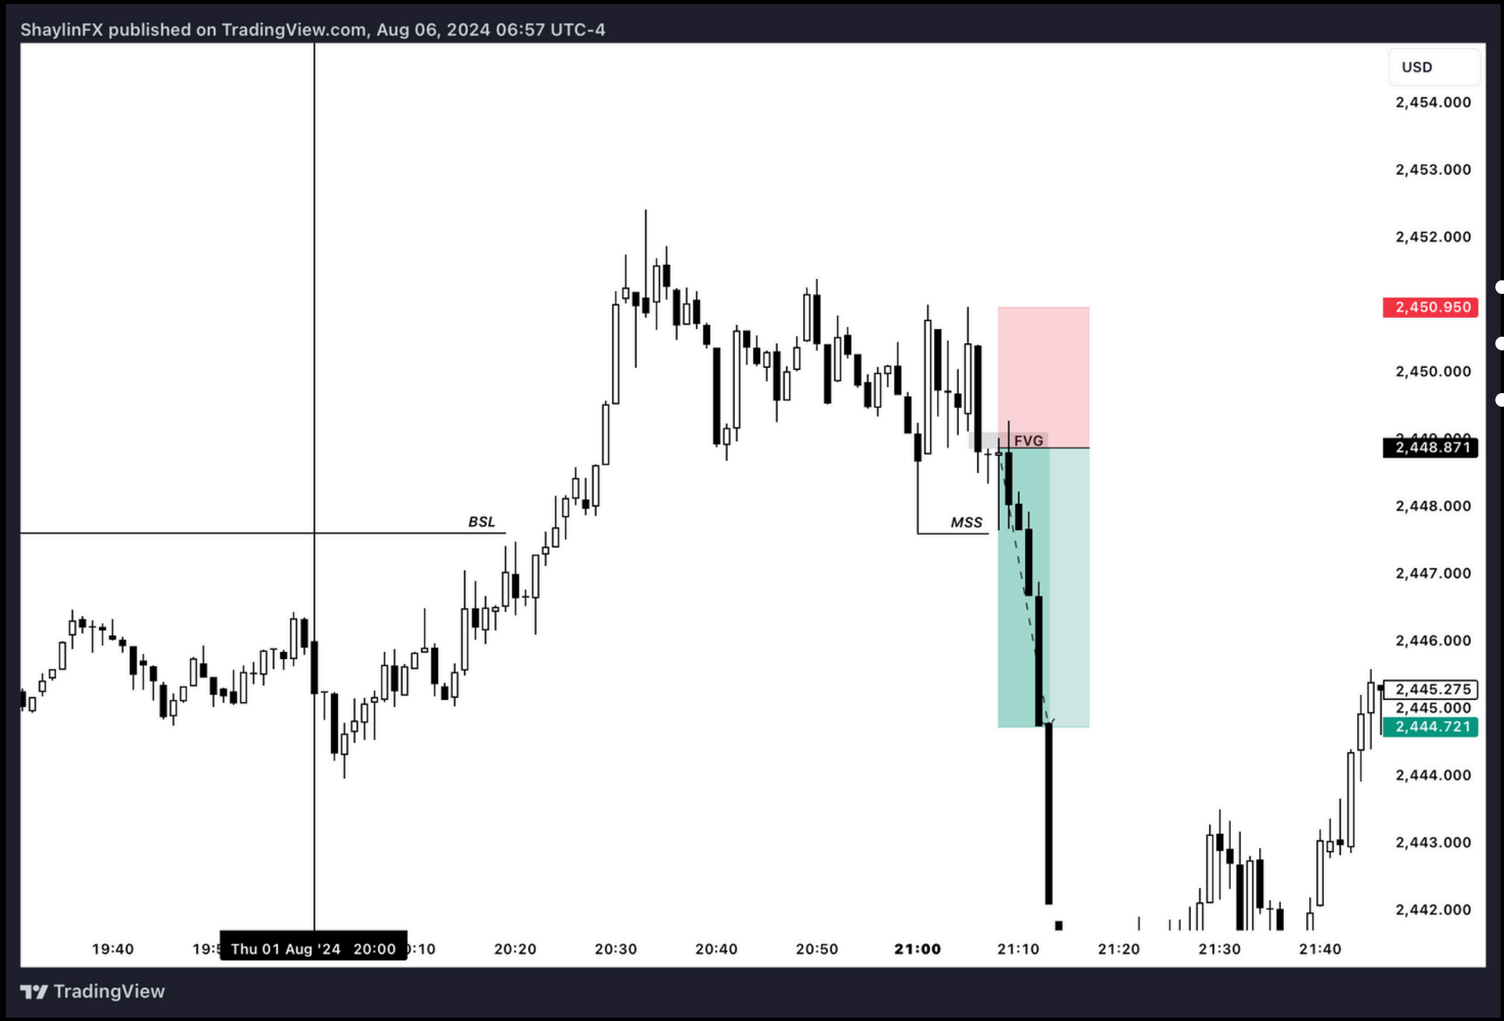
EXAMPLE :

- 15M Buyside Liquity was purged
- therefore you look for sells on the 1M/3M Timeframe

EXAMPLE

𝕏 @ShaylinFX



- A MSS was created + FVG was formed
- putting my so at the formation of the FVG
- going for 2RR

EXAMPLE

𝕏 @ShaylinFX

After 2RR was complete I put my sl at break even and let it ride till the 15 minute recent Sellside Liquidity
